PERFORMAX[®]
International collection

Water hyacinth has won the heart of many designers as an ideal material for furniture upholstery. Physically, its durable spongy texture provides comfortable touch. Mentally, its look render warm natural ambient.

Found in 1995, Performax has achieved the blending of elegant design with water hyacinth's sensual feature into home furniture. Seamlessly integrated forms with functionalities through creativities, researches, experiments, an refinments. On manufacturing, while works on wood and other components are carried out by machinery tools for their uniformity and preciseness, weaving of water hyacinth on each piece of the furniture is individually hand-woven by on site craftsman under tight quality control.

In continue pursue of using eco-friendly material for its furniture product, in 2010 Performax started new range of product using bamboo as main material. Their designs however deviated greatly from traditional bamboo furniture style. Besides exploiting bamboo's extra-ordinary strength, its resilience quality is well cultivated in the bold and stunning designs.

Performax offers full range of house-hold furniture and accessories in modern and contemporary graceful designsfor living room, bed room, and dining room. They fulfill lifestyle of consumers who cherishes simplicity and nature friendly conscience,.

Hyacinth our developed were designed to be sofa.
An important part to help relax with natural touch and color.
Special Identity it helps create a warmer atmosphere in the home.

If it is comfort, quality and feel.
This is the first thing we consider about most users.
With the natural materials we use, the user can reduce fatigue,
relaxation, aromatherapy, reduce the impact of spas in the home

Living room is a very important area.
It is the family to rest.
Wepay attention to the living room.
And choose natural materials.
To feel natural and relaxed.

WATER HYACINTH

Water hyacinth are tropical water plants that can multiply themselves within a few weeks. Despite their beautiful violet flowers, their too quickly reproduction caused them to be abandoned by gardeners into public waterway which they now congest. Cultivation of water hyacinth from their natural habitats is a form of improving eco system, and waterway transportation.

Aware of their strong fiber, endurance and beauty, we picked up this unwanted plants and tediously process them into household furniture upholsteries that present warmth and natural ambience.
